Geometry Seminar

The Hochschild and cyclic homology of Koszul Calabi-Yau algebras

Professor Chen Xiaojun
Sichuan University, China

Date: February 11, 2014 (Tuesday)
Time: 4:30 – 5:30pm
Venue: Room 210, Run Run Shaw Bldg., HKU

Abstract

Calabi-Yau algebras are now being widely studied by mathematicians. In this talk we study some algebraic structures on the Hochschild and cyclic homology of Koszul Calabi-Yau algebras. It is already known that for a Koszul algebra, its Hochschild and cyclic homology groups are isomorphic to those of its Koszul dual respectively. In this talk, we show that for a Koszul Calabi-Yau algebra, these two isomorphisms are in fact isomorphisms of Batalin-Vilkovisky algebras and Lie algebras respectively. Some applications of these isomorphisms will be discussed. Joint with Eshmatov and Yang.

All are welcome
